Logan Belko

St. Louis, MO (open to relocation) | (636) 275-5373 | lpbelko44@gmail.com
Portfolio | linkedin.com/in/logan-belko

SUMMARY

Recent B.S. graduate in Sustainable Built Environments working where healthy places and healthy people meet. Experience in post-occupancy research, ecological field assessment, and GIS spatial analysis, including published capstone research on a LEED Platinum facility. Seeking entry-level roles in sustainability, environmental and EHS work, and GIS.

EDUCATION

University of Arizona, College of Architecture, Planning, and Landscape Architecture Tucson, Arizona
Bachelor of Science in Sustainable Built Environments May 2026

- Emphasis: Sustainable Real Estate Development | GPA: 3.78
- Relevant Coursework: Sustainable Building Systems, Building Performance, Energy Efficient Design, Urban Ecology, GIS & Spatial Analysis, Environmental Analysis
- Honors: Academic Distinction (2023), Dean's List with Distinction (2024), Dean's List (2025, 2026)

SELECTED PROJECTS

Campus Recreation Post-Occupancy Study (SouthREC vs. NorthREC) Senior Capstone | Spring 2026

- Designed and ran a mixed-method study comparing a LEED Platinum recreation center (130,000 sq ft) with a non-LEED facility (52,000 sq ft): 259 machine observations over 4 weeks and 106 intercept surveys.
- Found utilization stayed low (10.5–17.2%) while treadmill and stair machine use reached 46.6% and access problems hit 35.7%, showing demand concentration, not total capacity, drove user experience.
- Recommended equipment relocation and circulation changes; research published in the University of Arizona repository.

Rincon Heights Ecological Restoration Plan SBE 424 Urban Ecology | Spring 2026

- Led a field assessment of a campus-adjacent Tucson neighborhood: 8 site visits, 6 quadrats across 4 landscape types, and species identification with Seek by iNaturalist.
- Recorded 23 species (19 native), 118 individuals, and 9 bird species (Shannon H′ = 2.64); found vegetated edges held nearly 3x the diversity of paved lots.
- Traced 1992–2025 aerial change and mapped the site in ArcGIS Pro; developed a three-stage plan (Repair, Reconnect, Regenerate) with 15 interventions and implementation partners.

Shade, Pavement, and Heat in St. Louis: GIS Analysis LAR 470 | Spring 2026, rebuilt 2026

- Integrated 2025 NLCD canopy and impervious rasters, Trust for Public Land heat severity, and ACS race and income for 104 census tracts in ArcGIS Pro using Extract by Mask, Zonal Statistics, and table joins.
- Tested the original hypothesis with correlation analysis: pavement explained 62% of tract-level heat variation, while canopy and heat showed no meaningful link to income; designed 5 thematic maps, including a 9-class bivariate map.

Net Zero Retrofit Strategy: Barrio Metalico, Tucson ARC 461M Energy Efficient Design | Spring 2026

- Applied the Path to Net Zero framework to a nine-unit infill development, proposing a load-reduction-first strategy: exterior shading, low-e glazing, cool roofs, heat pump HVAC, solar hot water, and expanded rooftop PV.

PROFESSIONAL EXPERIENCE

University of Arizona Campus Recreation Tucson, Arizona
Certified Personal Trainer & F45 Coach February 2024 – October 2025

- Managed programming, scheduling, progress tracking, and records for ~25 clients over 2 years.
- Observed daily equipment use and movement patterns in a high-traffic facility, which became the basis for my capstone research question.
- Explained technical information clearly to clients of varying backgrounds and abilities, and worked with staff to keep daily operations safe and consistent.

CERTIFICATIONS

OSHA 30-Hour General Industry (in progress) | CPR / AED / Adult First Aid

SKILLS

- **Sustainability:** Post-Occupancy Evaluation • Building Performance • Energy-Efficient Design • LEED • Sustainability Planning
- **Environmental:** Ecological Field Assessment • Quadrat Sampling • Plant ID • Biodiversity Metrics • Restoration Planning
- **GIS & Data:** ArcGIS Pro • Raster Analysis • Geoprocessing • Cartography • Census/ACS Data • Survey Design • Excel & Google Sheets • Data Visualization • Technical Writing
